# FIGHTBAC Hand Sanitiser

PROVIDING LONG-TERM DEFENCE AGAINST VIRUSES. BACTERIA & INFECTION

KILLS 99.99% OF BACTERIA & VIRUSES

\* TESTED TO \*

EN1276 & EN1650 STANDARD AGAINST BACTERIA & FUNGI – EN14476 AGAINST VIRUSES

FIGHTBAC is an alcohol free foaming hand sanitiser which has been scientifically proven to kill 99.99% of bacteria and viruses. Formulated to provide long-term defence without needing to dry your hands after application, FIGHTBAC hand sanitiser offers a wide range of benefits over and above those associated with alcohol-based alternatives:

- ✓ stays active long after application
- ✓ non-irritating and gentle on skin, suitable for use by children
- ✓ non-flammable
- ✓ odourless and no sticky residue
- ✓ much less of a threat in cases of accidental ingestion
- ✓ non-hazardous for purposes of storage

## HOW FIGHTBAC HAND SANITISER WORKS

FIGHTBAC hand sanitiser uses a combination of quaternary ammonium compounds including Benzalkonium Chloride (BAC) and Didecyl Dimethyl Ammonium Chloride, proven to be effective in killing bacteria, human coronavirus, influenza, MRSA, norovirus and SARS among many others. The biocidal activity in FIGHTBAC breaks down viruses and prevents them from replicating. Our formulation provides a protective anti-viral and anti-bacterial shield on skin which can remain active for up to six hours after application.

**HOW TO USE:** FIGHTBAC contains a foaming element meaning it is incredibly economical when used in a foaming dispenser or bottle, ensuring only a small, but correct amount of sanitiser is used. Our product is equally effective when used straight from the bottle or in a standard spray bottle/dispenser. Massage into all areas of hands and wrists to achieve protection.

**KILLS UP TO 99.99% OF BACTERIA & VIRUSES**  
**NOT TESTED ON ANIMALS**

**ECO FRIENDLY**  
**MADE IN SHROPSHIRE**

AVAILABLE IN 5LTR JERRY CANS | 1 X 5LTR £10 (INC. VAT) | RE-SALE/BULK BUY: POA
